WINE & MORE

## ABOUT ORGANIC WINE

“An organic wine is a wine made from grapes that have been grown without the use of artificial or synthetic chemicals, such as herbicides and pesticides. To keep the weeds and bugs at bay, organic farmers work with nature, rather than against it, by boosting their vineyard’s biodiversity. For example, they introduce cover crops to provide a habitat for beneficial insects that are the natural enemy of problem species or have small sheep graze between the vine rows, eating the grass and weeds. In this way, the vineyard becomes a self-regulating, natural ecosystem, thus enabling it to combat problems intrinsically and eliminates the need for artificial, and potentially toxic, chemicals”
